

THERMOFORMING LIMITED

Product Safety and Quality Management policy.

Propac has a documented Safety and Quality Policy, which is reviewed at management review and if changed will be communicated, understood and implemented throughout the organisation. The major objectives of the product safety and quality management policy are:

- To ensure that safe and legal products supplied, are fit for the intended purpose and meet the customers' needs and expectations.
- To seek opportunities for future development and continuous improvement by developing partnerships with customers and suppliers.
- To be aware of the contributions of all personnel and be committed to the investment in human resource and financial development to ensure the ongoing development of the business.
- Objectives are achieved through applying clearly defined Quality Procedures including high standards of safety and hygiene management, quality control and assurance. The company also has a commitment to continuous improvement in efficiency and cost effectiveness.

To reinforce this, the company works according to the requirements of the BRC/loP Global Standard for Packaging and Packaging Materials-Issue 5.

M. Gillies
